

SILICON SIDE HEATER FOR 200 LT DRUMS (FRF-11)

AMARC silicone rubber side heaters represent an ideal solution for heating the substances contained in metal drums: soaps, fats, various foodstuffs, varnishes and various chemicals products in order to facilitate their transfer and pumping. All our heating bands are marked with identification numbers and lot for their traceability. They are resistant to moisture and chemicals.

TECHNICAL DATA

Power: 1500 W

Voltage: 230 V

Current: 6,5 A

Maximum temperature: 0°C - 120°C

Regulation: adjustable thermostat from 20°C to 120°C

Protection: IP 55

SPECIFICATIONS

Length: 1665 mm

Height: 180 mm

Weight: 2 kg

Material: silicone rubber band with double insulation and practical fastening spring

Power supply cable: 2 m

HEALTH AND SAFETY

All silicone side drum heaters are manufactured in accordance with EC Directives. It is recommended not to put or keep in operation the side heater during the filling, refilling or drum emptying. It is also recommended not to keep the power cable plugged in during the movement of the side heater. In order to prevent spills of substances due to rise in their temperature it is recommended not to fill to the brim the drum and to work always in a well ventilated area.

PRODUCT ADVANTAGES

Specially created for steel drums. Designed to heat from the outside, avoiding contact with the substances contained inside the drum. It does not contaminate nor burn the substances in the IBC. Manufactured with high quality silicone and extremely resistant. Our heating jackets comply with EC standards.
